

SYSTEMS FOR DOORSTATIONS DOOR PHONES & CUSTOM CONSTRUCTIONS

CTC Production and quality standards

CTC operates under the continuous process of research, development and production of technologically reliable products. Its main activity is to specialise and provide integrated solutions on control and security systems for both buildings and houses. It develops and manufactures high quality door phones, intercoms and intercom systems, as well as custom-made doorstations, security systems and signages for buildings

The growing trajectory and development, combined with the specialized and rich in expertise staff, as well as the quality and durability of the materials used, have given the company a leading and competitive role in both Greek and international markets.

Our company imposes quality management system that complies to ISO 9001.

All the products comply with the international certifications of operation, quality and organization CE and TÜV Austria.

BUS 2k

Technology and aesthetics at first sight

2 wire, coloured touch screens with hands-free operation.

Entry Control (door entry systems) is nowadays, the most basic and simple function of protection that every building or house should have.

The technology of the future combined with a multitude of features provides the installer a greater convenience and additional functions to the user.

Digital technology has substantially reduced the amount of wiring as it requires only 2 wires from the doorstation to the internal components.

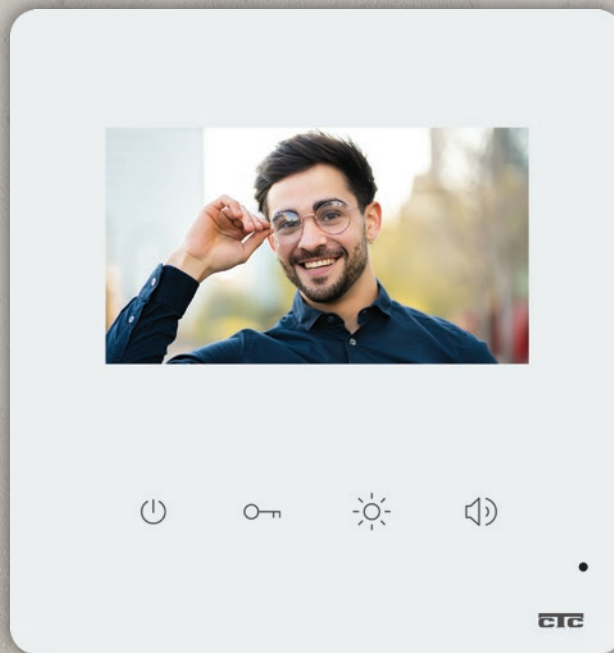

This simplifies greatly the installation, mounting and operation of the system.

The harmonious finish combined with high end technology, lines and high-quality materials characterize all the monitors produced by CTC.

An integral part of the interior design with unique advantages and multiple functions directed in providing comfort and safety of space in the modern era, it is the perfect choice for all those who value quality and high aesthetics.

Taking advantage of the new architectural trends with impressive constructions and affordable prices, the company expands its program on new products with the new Bus system in the doorstations' sector with consistency, flexibility, continuous progress and constant updates.
